

2011 ARRL RTTY Roundup Results

By Jay Townsend, WS7I ws7i@arrl.net

Don't measure yourself by what you have accomplished, but by what you should have accomplished with your ability. - John Wooden

The Look of a Participant

Each participant in the RTTY Roundup makes this contest a special and fun-filled event. Don, W2DPT was right, "The World was Alive with the Sound of Diddle." RTTY Roundup is driven by the many guys and gals trying to improve on last year results, work a little DX or the next state they need more than operators chasing wallpaper, plaques, and the head of the Top Ten Box. Roundup focuses not just on the winners but rather on all participants. RTTY has big guns, and little pistols or as Marty, W8AKS stated, "little squirts" as well. This year we will take a regional focus and highlight participants as well as the results.

Everyone shares common contest like the RTTY Roundup. multioperator stations and clubs items to prepare. The level of participant seeks does seem to

RTTY testers often set a equipment, antennas, computers, other necessary parts in the grand Here is a typical comment from goals set for the contest. One was achieved, unfortunately - not sure but I still need WY to complete to better my last year's effort,

For several years we've contest logs received but this year was different as the number of submitted logs for the ARRL RTTY Roundup did not increase. Perhaps the timing of the event, moving to a week later than normal was significant and there were numerous conflicts, such as Ham Radio University. Having the CW North American QSO Party run on Saturday didn't help either as everyone had to avoid interfering too much with stations on close-by or shared frequencies. [With New Year's Day falling on Saturday this year, the January contest calendar was a little confused – Ed.] Participants from 132 different countries sent in nearly 1,600 logs containing about half a million contacts from the 24 hours out of 30 that stations may operate during RTTY Roundup.

ground when preparing for a Single-operator stations, all work on many of the same radiosporting success that the correlate with preparation. goal, make a plan, work on programs, buffers, and all the quest to enjoy the event. Peter, HZ1PS: "I had two to work Wyoming - not where the WYs were hiding WAS RTTY. The other was which I did."

Affiliated Club Competitions

We always discuss the major impact that clubs have had on the RTTY Roundup contest. Wayne, N2WK sent in a photo of his group, the Orleans County Radio club that won the 2010 local category. The gavel they won is displayed along with their plaque. [The winning club in each of the three club categories – Unlimited, Medium, and Local – receives a gavel – *Ed.*] For the Orleans County club the most fun they have is competing as a team.

The Orleans County Radio Club RTTY Roundup team. Front Row: Bruce, WA2TMC; Wayne, N2WK; and Terry, KC2JKU. Back Row: Chuck, N8CL; Rich, K2EN; and Andy. KC2HZM. (Photo by N2WK)

Significant changes were afoot this year in the club ranks. The big news was the elevation of the Minnesota Wireless Association (MWA) to the Unlimited category in 2011 from the Medium category in 2010. From the Black Hole all that success needed was a plan for how to win. Surprisingly, they determined that success might hinge on following one of my favorite suggestions that I always give out for RTTY contesting: Time in Chair (also known as Butt In Chair). As you know, my other adage has always been more RF!

The MWA got together to help their members get on RTTY, practiced beforehand, and secured the commitment of many club members to get the contest tasks done. Having members like Bob, KØRC, Al, KØAD, Ralph, KØIR and others sure gets a club kick-started. This snippet from KØRC tells the story: "...worked VY2SS on 15 meters a few minutes ago, right after WØWQ..." and instead of the typical 'TU KØRC QRZ VY2SS' that Bob was expecting he heard diddles and a slower paced keyboard entry...OH NO! PLEASE NO MORE

MINNESOTA'. It reminds me of the old Saturday Night Live adage, "More Cowbell!"

The MWA has as its primary objective competing against other radiosporting clubs in North America. I would say that they have arrived. MWA won the Unlimited gavel and made a large impact on the RTTY and radiosporting club scene. This was the second club *ever* to score over 2 million points in the RTTY Roundup. Do I hear a loud and deserved round of applause?

The Potomac Valley Radio Club won the Medium Club category. This group outscored the second place Northern California Contest Club's Unlimited score in securing the victory. On the Local Club level, The Dominion DX Group secured the gavel by outscoring last year's winners, the Orleans Club.

Propagation

Last year's predictions turned out to be fairly accurate: Ten meters was back but showed very low activity. Puerto Rico, the northern part of South America, Arizona, and Southern California were found to have the highest 10 meter totals. WP3C, NP4BM, K6LL, HI3TEJ, W6WRT were the leading 10 meter stations.

Phil, GUØSUP remarked that it was great to see 15 meters more open than last year but that it was a shame 10 meters did not open from his QTH. Mike, K4GMH reported his QSO total on 15 meters was 10 times larger than last year. Mike didn't check 10 meters, though – on those slow Sundays it can be worthwhile clicking the band switch.

American and Canadian Highlights by Region

West Coast

Our highlighted West Coast participant is Kirk, K7EKM who is the resident tower monkey for the Spokane DX Association. Kirk wanted to try his hand in a RTTY contest. Last year while Kirk and I did some repair work at Gary, K7OX's station we decided to do the Roundup with K7OX. Two of this group were experienced RTTY guys but none of us had operated together prior to the 2011 Roundup. "We" made some strategy changes during the contest... we started on 15 meters and I made them stay there hour after hour. I told them that we would save 20 meters for later in the weekend. Luckily it worked as K7EKM, K7OX and WS7I snared the Multioperator, High Power (MSHP) victory for the Region, piloting the K7OX station. Kirk will get his first plaque!

The West Coast Region stretches over very long distances and we see many band opening differences. Operators in British Columbia don't always share the same openings with operators from Arizona. From Yuma, Dave, K6LL worked 98 contacts on 10 meters while Lee, VE7CC had not a single 10 meter QSO. It was a very tight race with just a little separation between these two stations when the amps

West Coast Region

W7IV	130,185	MO	HP
KK7PR	113,715	MO	HP
W9NGA	107,360	MO	HP

finally cooled off. After log checking there were just a few QSOs difference between the two stations and the southern end of the Region won this year. K6LL was fourth in the Top Ten and VE7CC was fifth. David, W7WW also from Arizona, hit the Top Ten Box with the tenth and final spot for his efforts this year.

Gene, KB7Q entered his third full-time RTTY Contest. He wanted to see if he could increase the Northwest Division's Single-Operator, Low Power record and move up in the Top Ten list this year. Gene related that "Making a 'log-then-grab' key in N1MM logger and spending two hours Sunday morning mining that 20 meter opening to Europe with an extensive S&P effort worked well."

I guess I no longer feel so bad that Gene replaced my long standing Northwest Division Low Power record, also done from Montana many years ago. KB7Q finished up sixth in the Low Power Top Ten operating at WA7U. N6OJ took the Pacific Division title again this year. K8IA secured first place in the Southwestern Division.

West Coast Region Multioperator, Low Power stations saw Paul, N6MA rank sixth in the Top Ten while grabbing the Southwestern Division plaque. Murph, N7UVH placed eighth as well as obtaining the Northwest Division plaque. The Canadian winner out of British Columbia was Erik, VA7RY. He rounded out the final place in the Top Ten.

After the K7OX sixth place overall finish and Northwest Division plaque it was K7BTW and W7IV in a very tight race with only a few points separating them. Yet K7BTW was ninth overall and W7IV who had some trouble with the coils of his 80 meter Yagi antenna finished just out of the Top Ten box.

Midwest Region

An interesting participant from Kansas is Jeff, AC0C. Jeff operated the Roundup using no exterior antennas and has quite a site with his stealth contesting antennas. It's quite a feat to get over 1,000 QSOs and 90- some thousand points with interior antennas!

Midwest Region

Dakota, Midwest, Rocky Mountain and West Gulf Divisions; Manitoba and Saskatchewan Sections

K9MBB	140,026	MO	HP
WA5ZUP	124,920	MO	HP
WT9Q	88,954	MO	HP

Winning the Dakota Division, Dan, KØTI was fourth overall in the Top Ten for the MWA, and Bill, KE5OG placed seventh overall in the Top Ten. From Colorado, Steve, KTØDX was the Rocky Mountain Division winner and eighth overall. Gary, WØAW took the ninth spot overall and, of course, was a MWA guy as was Al, KØAD who secured the final spot in the Top Ten list. NTØF won the Midwest plaque.

Switching over to SO2R, Ken, WØLSD took top honors in Single-Operator, High Power for the Midwest Region and the Rocky Mountain Division. He set a personal all-time best while securing third place in the overall Top Ten. Another trying SO2R was George, ABØRX at WØMA where he nailed sixth place along with the Midwest Division hardware. Jim, W5AP was eighth and won the West Gulf Division. Susan, K5DU secured the ninth spot with her one radio and might be the only station running SO1R in that box. Ralph, KØIR won the Dakota Division.

Natasha, KU1YL and Alex, KU1CW navigated her station to fourth overall. They won the Midwest Division and the Midwest Region in Multioperator, Low Power. The West Gulf Division was won by Glenn, WB5TUF.

Ron, KOØZ contested with his fiancée Debbie who had such a great time that she now wants to earn her ticket. Doug, AAØAW won the Dakota Division and Steve, WØSM won the Rocky Mountain Division.

In Multioperator, High Power it was the NØNI crew that moved up from last year's Low Power category to win a new title. Running high power only gave them 100 more contacts and fewer multipliers than last year but it made the pileups easier. Giving out South Dakota as usual was high flyer WØSD. The crew placed second overall in Roundup and won the Dakota Division plaque. Winning the West Gulf Division was K9MBB out of Texas. WA5ZUP cleaned up the Rocky Mountain Division this year.

Central Region

Our featured participant from the Central Region is Scott, K8SM who set out to win both the Great Lakes Division and Ohio Section Low Power awards. The last certificate that Scott won in an ARRL contest was Novice Roundup in 1979 when he took 1st place. Novice Roundup was a lot of the inspiration for the RTTY Roundup. K8SM loves the ARRL RTTY RU contest. His determination to beat his 2010 score led to 12 hours straight in the chair with his XYL (KD8EIJ) and girls (one is KD8EIP) bringing him food and drinks. Scott claimed, "I am NOT a big gun." Sorry Scott, when you win the Division plaque, place in the top five in the entire Central Region, and win Ohio you are indeed a 'Gun'.

WZ8P	96,710	MO	HP
N2BJ	93,936	MO	HP

In the Central Division, Single-Operator, Low Power was won by Mark, KB9S and Clive, VE3KAO won the Ontario Section.

Single-Operator, High Power in the Central Region was won once again by Steve, AI9T. This year he also scored well with a Top Ten seventh place. Bill, K3WA had problems with SO2R yet he had this to say, "Kudos to the non-contesting hams that joined the fray." Winning the Great Lakes Division was Tom, W8JWN making it two years in a row.

Multioperator, Low Power in this Region was won by N8LRG. They were also fifth overall. Once again, K9NR won the Central Division, this time seventh overall in the Top Ten. Placing fifth in the Top Ten box was N8NR who won the Great Lakes Division. NØIJ collected the Central Plaque.

Southeast Region

A special contester from this region is Marty, W8AKS from West Virginia. Marty has given many of us that important West Virginia multiplier for many years. Marty's goals weren't unlike those of many other operators. He was shooting for 500 QSOs. Marty came close but ran out of time with 490 in the log. He looks forward to Roundup every year.

Marty, W8AKS in Roundup handing out the sought-after West Virginia multiplier. (Photo by W8AKS)

Living in the Southeast Region makes for great contesting and DXing. I've not been lucky enough to live where propagation is always so good! The Southeast Region secured three overall category wins out of the four available in the US and Canada.

Winners included Single-Operator, Low Power winner Don, AA5AU (as usual). The Single-Operator, High Power record was set by Mike, K4GMH who repeated as our overall winner of the category. Multioperator, Low Power was won by Glenn, N5RN with assistance from using the cluster. It's a bit odd that Pat, W5WMU doesn't fire up the station in Multioperator, High Power once in a while. Perhaps I'll have to give him a call!

NR4M	130,626	MO	HP
W4MYA	129,402	MO	HP
N4KFT	128,649	MO	HP

Fred, WW4LL tried to give AA5AU a race but he found that his software left him chasing calls around the screen and in the end Fred could only make a second place finish. Losing to Don isn't really very hard to do. Mark, N2QT was fifth overall out of Virginia in the Low Power Top Ten box.

Bill, W4RM and his crew only do one RTTY contest as they are CW guys – and that is the RTTY Roundup – but they took fourth place. Jan, K4QD with the “Florida Boys” claimed the eighth place finish in the MSHP category. Finishing up tenth overall was Steve, NR4M and the “Goat Gang” (they contest from a farm).

Northeast Region

Single-Operator, Low Power in this Region was won by Fabi, VA2UP. Fabi set the new Canadian Low Power record while securing third place overall in the Top Ten box. David, K2DSL won the Hudson Division. Norm, W1BYH captured the New England plaque. Bob, WØBR took the Atlantic hardware from Eastern Pennsylvania.

In the Single-Operator, High Power category it was Wayne, N2WK who placed second overall. He set a new personal high score and won the Atlantic plaque. David, K2ZC from New Jersey captured the Hudson hardware. Pamela, K6NDV – whose call is often confused with that of Will, K6ND – won the New England Division. My XYL Betsy, WV7Y and I once had calls that were one letter different. After several “not in logs” from RTTY pileups we changed to calls that were quite different – no more confusion and many fewer “not in logs”.

Multioperator, Low Power was won by KS1J who placed second overall in the contest while also getting the New England plaque. Terry, KC2JKU won the Atlantic Division.

Our featured Northeast Region RTTY station this year is the W2V Multioperator, Low Power team. They won the Hudson Division while placing eighth in the Top Ten box. The call W2V was a special event of Ham Radio University. W2V reported that their rate was slowed by the call, “One station, a KH6, refused to work me unless I sent my whole call. I think his message was, ‘No partial calls please!’” They did manage to work the KH6 a bit later on.

The Multioperator, High Power category was secured by K1SFA who was third overall and won the New England plaque. N2KI won the Hudson Division. The Atlantic Division plaque was secured by WA2TMC.

New US/VE Records

Records indicate just how much the sport of RTTY contesting has grown as the years roll along. This year Mike, K4GMH set the Single-Operator, High Power record by averaging over 100 contacts per hour, a feat long waited for in America. Seventeen new Division records were obtained along with 41 new Section records.

This was a record year for Canada as well. Fabi, VA2UP set the new Low Power record. Fabi reports, “Murphy generally strikes for me in this contest and I can never really do well or not as well as I'd like to but this time it all went smooth (still can't believe it), no broken rotors, no freezing computer, no coffee poured on the keyboard, didn't even trigger the building's fire alarm...nothing! I never really got any big or long runs but things were pretty steady so eventually I did better my last year's score”.

On the other side of Canada it was Lee, VE7CC who operated at VE7SV's QTH. Lee might well be the rookie of the year. He related that this was his second Roundup but the first serious one so far. Using SO2R keeps him very busy. When 10 meters arrives he will be a West Coast station to fear.

DX Highlights

The question posed in last year's results article was whether anyone could derail P49X's quest for his sixth straight Roundup Title. Ed, WØYK who operates in Aruba was the favorite going into the contest. Ed brought along another secret weapon into the event in 2011 going SO3R. I'm not sure how that worked out as 10 meters didn't seem to generate all that much activity. 20 meters was his money band with 15 meters a close second. His 2009 record still stands but Ed certainly wasn't challenged in 2011. A tip of the hat to Ed – now a six-time champion!

The featured DX participant this time is Simo, OH2HAN. It seems that my friend Tapani, OH2LU is his mentor and encouraged Simo to write this account for us to get a feel for the DX end of the RTTY Roundup:

The OH2HAN RTTY Story

Having been a radio hobbyist since the 1970s, listening to DX broadcasting stations, I passed my ham examination in 1997 and started to operate mainly on SSB as OH2HAN. One of the milestones in my career was WRTC which was held in 2002 in Finland and my station was one of the contest sites. It was really eye-opening to watch real competitors working!

Caption: Simo OH2HAN with two beauties: Siberian cat Olga and Tandberg Hurdle 5 receiver from the 1950s (Photo by OH2HAN)

Another milestone was the DXpedition in 2007 with Tapani, OH2LU and Pasi, OH2MZB to Market Reef where we participated in the SARTG WW RTTY contest as OJØMI and gained first place in the World in the Multioperator, All-Band category. That was my wake-up for fascination of contesting RTTY! After that I have participated [in] numerous RTTY contests, of which ARRL RTTY RU is one of the most important. It offers a lot of other competitors so you need not to be alone on the bands, which makes it real fun!

This year I operated ARRL RU in Single-Operator, High Power category and my preliminary result is 952 QSOs and about 93.000 points. Conditions on Saturday were poor here in Finland, but on Sunday it changed. Openings on 21 MHz have been rare here in the Northern Hemisphere during recent years but on that Sunday it was nicely open – I got about 120 QSOs there among others with VK, E21, EA8, ZS, VU, VE, CO, P49, HI and some North American stations, too. Sunday evening was very nice with numerous North American stations on 14 MHz.

My contest strategy is to first seek good multipliers and secondly to seek volume which usually happens during afternoon/evening time, when European stations appear in quantities on the bands and it is possible to build fine pile-ups. Quick band changes are my favorites and a must, too, because high bands are open very limited time here. One important part of my contest strategy is my wife Sari who eagerly takes care of my catering! Actually she is so keen on radio

that she made her amateur examination a couple of months ago and got the call sign OH2FVI. Maybe we will participate [in] future contests in Multioperator category – hi!

The OH2HAN ham shack is situated in another building so the disturbance between family and contester is minimal! (Photo by OH2HAN)

As to hardware I have a tower of 100 feet equipped with a 2-element 7 MHz beam and a 10-element tri-band beam for 14-21-28 MHz. Both are made by Finnish Antenna Ltd. Newest antenna is a quarter-wave GP for 3.5 MHz, which seems to work quite well. My rig is Yaesu FT-1000MP Mk V with linears Acom

2000A and Tokyo Hy-Power 1.5. Signal decoding is made in two ways: by KAM XL hardware modem and MMTTY software modem. Of those I choose the one which gives more likely result. Operation software is an old DOS-based program developed and continuously updated by Jukka OH2GI. The operating system is WinXP. My other interests are bees, classical music and sailing.

Best 73s to all readers and see you on the bands! Simo Sorvari OH2HAN.

Many thanks to Simo for the interesting story from the other side of the pond. It's refreshing to see what contesting is like in Europe.

Action in the DX Single-Operator, Low Power category was pretty much from prime spots in South American and the Caribbean from which the states and provinces can be easily worked. It was Ted, HI3TEJ with the top score. Setting a new Puerto Rico record was Alfredo, WP3C in second. The Low Power Aruba station of P4ØP with Robert, W5AJ operating was in third. The great signal of 5C5W operated by Mohamed, CN8KD was fourth.

As discussed earlier P49X led the Single-Operator, High Power category. Europeans took the next four spots but without good propagation to the US these operators were not a serious challenge for the lead. LZ8E driven by LZ2BE finished in second place. Tightly behind in third place was SO4M with SP4MGP in the operator's chair. Of note was JM1XCW with a nice score out of Japan.

**Top DX Scores
Single-Operator
Low Power**

HI3TEJ	159,600
WP3C	144,509
P4ØP	128,068
5C5W (CN8KD, op)	126,170
J39BS	96,416
EA3GLB	94,830
VP9/MW3S	91,368
ZC4LI	71,071
NP4BM	68,875

YO9HP	132,240
KH6ZM	126,015
YT5W	97,308
OH1F (OH1NOA, op)	96,960
OH2HAN	90,404
JM1XCW	89,128

This year in the Multioperator, Low Power category it was HI3A taking the honors. The KP2D group can't seem to shake the second-place jitters and took it again this year. Then it was the Europeans with a bunch of new faces in the Top Ten. UT7E was third. OH8KTN was in fourth and IW1QN fifth.

The big change this year was in the Multioperator, High Power category with what is usually an all-European-dominated group. Hector, XE2K with just packet assistance won top honors this year. OL8M operated by Pavel, OK1DRQ was in second place. Closely following Pavel was the IQ1RY group in third place. They related, "It was a first for us and we went through this learning the magic of the things."

In the 2011 RTTY Roundup there was one new Continental Record set along with 35 new Country records. There was not as much action here as propagation was difficult at times to many parts of the world. No doubt next year will likely be better.

Technical guys who answer the tough question

RTTY is a technical mode and when you have a terminal program talking to a logging program, all the while running through another program controlling an interface, things can get very interesting. One of our RTTY gurus and a guy who always has the technical answer is Chen, W7AY. He gives the entire RTTY group some fine insights into the technical background

of much of the software and hardware that we use. While looking for some stuff on his web site I found the fine picture shown here. Since we no longer have the big RTTY gathering in Dayton, sometimes we don't get to put faces to those emails.

Chen, W7AY – one of the premier RTTY technical guys.
(Photo by W7AY)

Next Year

By now you might be thinking of building or buying that interface to get your computer hooked up and doing RTTY for the next Roundup. This digital sport is what makes the bands come alive and fills the bands with old-time RTTY signals. The solar cycle is in full swing so don't miss the RTTY Roundup... a radiosporting event that tests your skill and ability. Roundup is "The most fun you can have in 24 hours!" according to AA5AU.

K8LF relates, "Was hoping to work some PSK but all the activity seemed to be on RTTY. Who says you need high power and big antennas for RTTY? I had a wire literally thrown over the house and low power. Worked 43 states and 13 countries and had lots of fun doing it." We need more PSK31 action for 2012. Will the 4,000-QSO barrier get challenged in 2012? Will 10 meters be a factor? Will SO3R be the next big breakthrough?

Use the rest of this year to plan your strategy for the next Roundup. January 6-7 will be the contest dates in 2012.

73, Jay, WS7I
